Map 5: Zone 2: Drumgold/Salville

**Overview of Area**

The main goal within this Master Plan Zone 2 will be to facilitate the regeneration of the older more established residential areas with improved community and retail facilities, on a coordinated orderly basis and to ensure that development is sustainable and is properly integrated into the area. The Neighbourhood Centre zoning will go towards addressing the lack of retail facilities on this eastern side of the town. The provision of integrated community facilities will also be of prime importance within this zone.

**Access & Linkages**

The emphasis will be on improvement of road infrastructure within this zone and access to the proposed N11 bypass, which will also improve accessibility in this zone. There is also potential to link the N11 to the R744 via a relief road to the rear of Salville and the Drumgold areas.

**Urban Design**

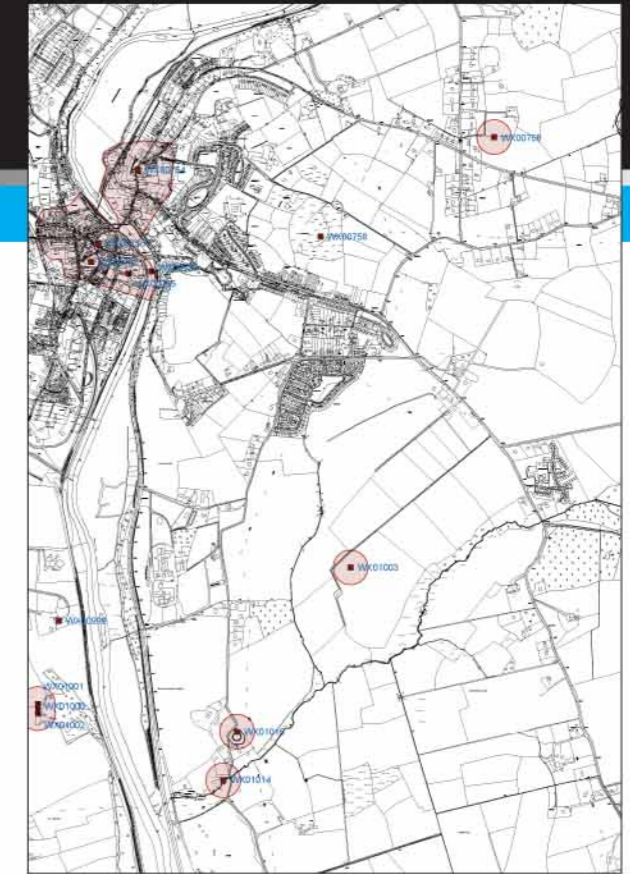

The main goal within Zone 2 will be to facilitate the regeneration of the older more established residential areas with improved community and retail facilities, on a coordinated orderly basis and to ensure that development is sustainable and is properly integrated into the area.

**Services**

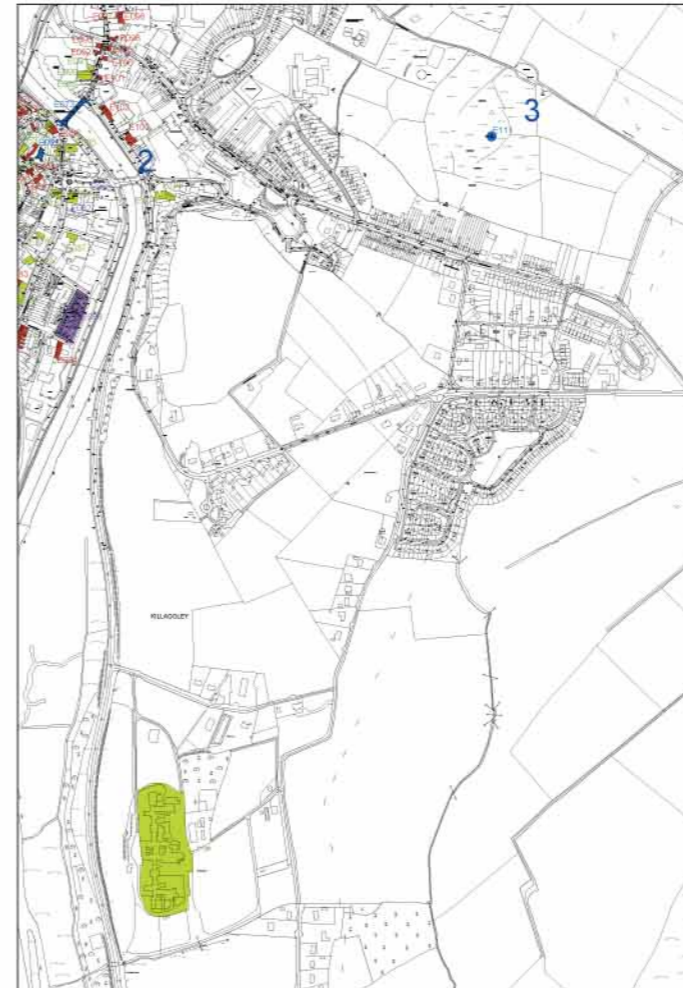

Parts of the area are serviced by public water, public foul sewers and public storm sewers. However, there are a number of constraints namely within the Salville area regarding the sewage pipe network. Presently there is a treatment plant located on Esmonde Road which will be decommissioned in the near future once additional capacity and network is available. In particular, these constraints relate to both the existing level of capacity within the Enniscorthy Town wastewater treatment system and the actual pipe infrastructure at a number of locations within the area.
