

County Wexford Wetlands Field Survey 2023

Wetland Surveys Ireland completed surveys on over 20 wetlands within the Gorey-Kilmuckridge district of County Wexford. The surveys identified the key wetland habitats on site with the view of determining their biodiversity value. The results are presented as a series of individual site reports.

The project is an action of the County Wexford Biodiversity Action Plan 2013-2018. The survey was funded by Wexford County Council and The Heritage Council and Department of Housing, Local Government and Heritage.

Further information is available from the Heritage Office of Wexford County Council.

County Wexford Wetlands Field Survey 2023

A number of important wetland sites were identified including; fens, lake and reed swamps, and swamp woodland.

The survey suggests that many important wetland sites remain unrecorded throughout the county and further surveys are required to improve our knowledge of Wexford's wetland heritage.
